

FOR IMMEDIATE RELEASE

TEKLYNX announces availability of driver support for all Cognitive printers

MILWAUKEE – May 23, 2007 – TEKLYNX® International, the world's leading developer of software products for the AIDC marketplace, today announced the availability of new driver support for Cognitive's most recent product line, the C Series, as well as its legacy products including Advantage LX and Del Sol LX printer models for use with its LABELVIEW™, LABEL MATRIX® and CODESOFT® bar code label design software.

"This development support is a sign of Teklynx's commitment to working with Cognitive customers. We are also looking forward to working more closely with the Cognitive team to generate demand for thermal label printing solutions," said David Pettiford, Teklynx Director of Marketing.

These drivers are available for download using the Driver Service Pack (DSP) utility on the TEKLYNX web site. The DSP is a free printer utility for TEKLYNX software, available at www.teklynx.com/printers, or by going to Download Center > Files & Utilities > Driver Service Pack.

Cognitive printers are known for their rugged and reliable quality performance. Its latest C Series printers now offer durability and performance packaged in a small footprint. The C Series printers provide a full connectivity suite, fast printing performance, large roll capacity, and abundant memory at 16 MB. The C Series printers are designed for Logistics, Healthcare and Postal/Parcel operations, including the following applications; shipping labels, parcel tracking, pharmacy label printing, and Product ID labels.

About TEKLYNX

TEKLYNX International is the leading software developer of AIDC products including software for label design, host connectivity, and data collection. Its software products feature the widest range of device and driver support in the industry. TEKLYNX is a Microsoft Gold Certified Partner and has connectivity relationships with multiple ERP software providers. Over 500,000 companies in 120 countries rely on its integrated software solutions for supply chain automation, warehouse management, shipping and receiving, inventory control and asset management. The company is headquartered in Milwaukee with operations in North America, Europe, Japan, China, and Singapore. More information on TEKLYNX International is available at www.teklynx.com.

About Cognitive Solutions

Established in 1986, Cognitive Solutions is a pioneer in the thermal printing industry, having introduced the world's first desktop thermal barcode label printer; the Barcode Blazer. Today, Cognitive continues to design, manufacture, and market a broad product line of thermal printing solutions including compact industrial mid-range, industrial desktop and portable printers. Cognitive maintains a strong presence in the Retail, Automotive, Manufacturing, Logistics, Parcel & Post, Healthcare, and Retail Pharmacy industries. Cognitive also offers standard and custom label services as well as software application solutions. With operations in North America, Canada, Latin America, Europe and Asia, Cognitive is positioned to support thermal label applications worldwide. www.cognitive.com
